About the Webinar

The aim of webinar on climate change and its impact is to create awareness among participants about the social, political and economic consequences that climate change may have on huge parts of mankind. India scored 7th rank in most affected countries in the year 2019. Many countries including India have witnessed sudden havoc through Landslides, cloudbursts,

heavy rainfall, hailstorms and the like have increased twenty-fold in the past five decades. To intercept this, a Webinar is organized to contribute equally to help prevent global warming. Similarly, we must identify the causes that are contributing to this dangerous phenomenon and work hard to find solutions. Furthermore, we must immediately put a halt to all those activities which are causing global warming.
